### EXAMINER'S AMENDMENT

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 35-58, and 67-75, drawn to A method of purifying water by electrodeionization, classified in class 204, subclass 524.
- II. Claims 61-63, drawn to a method of purifying water by reverse osmosis, classified in class 210, subclass 652.
- III. Claims 93-94, drawn to a method of purifying water by ion exchange, classified in class 210, subclass 660.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, III and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I, III has separate utility such as a method of purifying water that does not require the use of reverse osmosis used in invention II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. Steven Finch on July 6 a provisional election was made without traverse to prosecute the invention of Group I, claims 35-58, and 67-75.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Steven Finch on July 13, 2004.

The application has been amended as follows: In the claims:

Cancel claims 61-63 and 93-94 without prejudice. Further claims 42 and 43 have been amended to depend from claims 41 and 42 respectively.

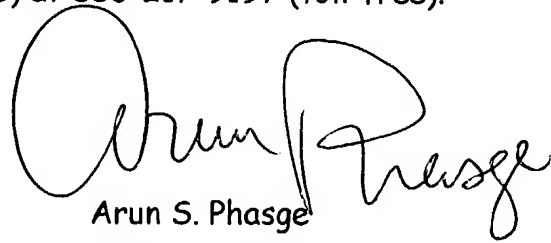

The following is an examiner's statement of reasons for allowance: None of the prior art of record fairly discloses or renders obvious the claimed method passing water through an electrodeionization cell having the claimed arrangement of layers to adjust the pH as claimed. Another embodiment utilizes reverse osmosis in conjunction with electrodeionization in a manner not disclosed by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arun S. Phasge whose telephone number is (571) 272-1345. The examiner can normally be reached on MONDAY-THURSDAY, 7:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam X Nguyen can be reached on (571) 272-1342. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
